

PADDLE FIGHT OPENS JUNIOR WEEK

FACULTY APPROVES HONOR SYSTEM FOR SOPHOMORE ENGLISH

Provisional Plan Would Excuse Honor Men From Exams And Attendance

WILL TRY TWO METHODS

Experiment Will Be in Option English Course Starting Next Wednesday

Approval of the honor group system for the English department was granted by the Faculty at their monthly meeting. According to the provisional plan, an experimental honor group consisting of ten men from the Sophomore English Option course, will be established beginning next Wednesday, April 20.

Ten men will be chosen for the group who have clear records in their English course. They will be put under the tutelage of Professor Penfield Roberts of the Department. The following is the approved plan which is to operate for the remainder of the second term and which provides that those admitted are to be excused from all requirements of preparation and attendance, and final examination in E22 Option.

Two methods of conducting the experiment are to be used, in order to test both. According to the first, week-

Clubs Will Use New Numbers For Spring Concert

Program To Include Specialty Acts by Quartet And Saxophone Quintet

Entirely new music by each of the Clubs including the singing of the prize song of 1927, "Hail M. I. T.," by the Glee Club together with four and a half hours of dancing to the music of the augmented Techtonians in the Imperial Ballroom of Hotel Statler will comprise the annual Spring Concert of the Combined Musical Clubs on Monday night.

Guests of honor for the concert will be President Samuel W. Stratton, Dr. Henry P. Talbot, Professor and Mrs. Samuel C. Prescott, and Alexander Macomber '07. Matrons are Mrs. Henry P. Talbot, Mrs. James R. Jack, and Mrs. H. Packard.

As has been the custom the Banjo Club will open the concert playing a group of new popular medleys and will be followed by the Glee Club singing "Gypsy Wind," "The Lotus Flower," and "Hail M. I. T." "The Lotus Flower," by Schumann was the prize song in the New England Intercollegiate Glee Club concert for this year in which the Technology Glee Club took second place.

For specialty acts the Glee Quartette will sing three numbers including "Dusky Sandman," by Brown and the Saxophone Quintette will play "Barcarolle" from Tales of Hoffman, "I'm Thinking of You," and the favorite "Sweet Adeline."

Various lighting effects including colored spotlights, will be used to enhance the presentation of the program. This has been made possible by the facilities offered by the Imperial Ballroom. Technology and fraternity banners will be used to decorate the walls of the ballroom.

HOLDERS OF MISSING Prom Tickets Warned

Several tickets to the Junior Prom have been reported as lost to the Prom Committee during the last few weeks. Their numbers are known, and any one planning to enter the Prom on one of them is warned that an attempt to do so will have disastrous results.

Selected To Head New Voo Doo Board

Ames B. Hettrick '28

HETTRICK CHOSEN FOR VOO DOO HEAD

Dempewolff Elected Managing Editor—Staff Elections Are Announced

In the current issue of Voo Doo, which appeared on the stands yesterday, Phosphorous announced the elections for Volume X. The announcement includes the following Board Elections: General Manager, Ames B. Hettrick '28; Managing Editor, Albert S. Dempewolff '28; Business Manager, Richard B. Goble '28; Art Editor, Everett S. Coffran '28; Advertising Manager, Fisher Hills '29; Literary Editor, Jerome B. Geisman '29; Circulation Manager, Frederick A. Celler '29; Treasurer, Earl W. Glen '29.

Other elections announced were: Art Staff, Wendell R. Holt '29, Levon Seron '29, C. Brigham Allen '29, Wilson T. Hammond '28, G. Ross Hammond '28; Literary Staff, Richard B.

BEAVER-B. U. GAME FOLLOWS ANNOUNCEMENT OF WINNERS IN TUSSLE FOR TECHNIQUES

BEAVERS FAVORED TO WIN IN INITIAL BASEBALL CLASSIC

Heavy Hitting Will Probably Feature Closely Fought Diamond Contest

M. I. T. HURLERS FAVORED

Baseball opens its official season on Tech Field tomorrow afternoon at 3 o'clock when the Beavers clash with Boston University. The game promises to be a close one and will have the added interest of exhibiting for the first time, the unusually fast organization of the new sport. Throughout the week the team has been making rapid improvement, especially in the batting department, and will go on the field in fine condition. There are as yet no twisted knees, strained ligaments, or glass arms to contend with.

Coach Silva has been giving some prominence to base-running, and seems to have confidence in the slugging ability of his men. Boston University must produce an exceptional pitcher to hold the team to only a few runs.

Duplin will probably take the mound for the Beavers and have David for his catcher. However, a wealth of material exists for the battery and includes some likely contenders in Farwell, Richards, Cline, and Ackerman. First base will be occupied by Crandall or Stanley, and second by Bell or Riley. Donahue is the main shortstop competitor, and third will locate either Cullinan or Boyle. Crotty, Fahey, Crosby or Reyniers will be selected for the field positions.

Boston University enters the game, crippled in that Donald Macdonald, its star twirler, is the victim of a strained back muscle. As he is the greatest

(Continued on Page 3)

Technique Rush Rules Allow no Spiked Shoes

1. To enter the rush you must have a Technique sign-up or a paid in full receipt.
2. All contestants should wear old clothes, no spiked shoes allowed.
3. Contestants will line up along the ropes. At the first pistol shot paddle number one will appear from some mysterious source.
4. Two successive shots of the pistols means that all contestants are to go back to the ropes. At the next shot a paddle will appear out of the hut and the entries will rush for it.
5. If you get a paddle report at the desk to obtain credit for it.

FIERCE FIGHTING ALWAYS SEEN IN TECHNIQUE RUSH

Great Court To Be The Scene Of Initial Event Of Junior Week

TEA DANCE WILL FOLLOW

Technology's annual respite from its labors, Junior Week, will commence in the Great Court tomorrow afternoon at 2:15 o'clock, with the Technique Rush slated as the opening event. From then until 4 o'clock Tuesday morning, the carnival spirit will reign supreme in "The Great White Factory." Clustered about every event of this rapid-moving "week" are some of the most precious traditions of the Institute, which are all the more valuable because they are so few, and continually decreasing in number.

As a preliminary to the actual tussle for the coveted paddles in the Rush, the retiring and incoming Managing Boards of Technique will parade to the hut in the center of the Great Court promptly at 2:15 o'clock, accompanied by a band. After forming in a huge circle around the hut, the lusty-lunged Harvard Stadium announcer will make public the elections to the new board of Technique 1928.

Pistol-shot Will Start Struggle

At the completion of the announcement, a single pistol-shot will rend the air, signifying that the first paddle is about to appear. This initial and much prized paddle, which entitles the holder to a free copy of the year-book autographed by President Samuel W. Stratton, will appear on the scene in a manner which is known only to the chosen few in the Technique management. A surprise is promised, and it has been stated that the paddle will positively not be released from the corner of Building 3, as has been the case for the past two years.

When the initial paddle has finally arrived at its ultimate destination, and the lucky recipient has been registered (Continued on Page 4)

FRESHMAN BASEBALL TEAM NEEDS MONEY

Lack of funds is the present ailment of the freshman baseball team since the only money at its disposal now is \$20 allotted it by the M. I. T. A. A. There is little or no equipment left it by the previous yearling aggregations, and as a catcher's outfit alone costs \$35, the team is in rather a bad way. In addition money is required for guarantees to teams which come here to play the Technology freshmen. Following the example of the Beavers, who were so successful in selling season tickets to their home games, the freshmen are planning a similar sale of season tickets which will take place after the holidays. The tickets will be sold to all freshmen and upper-classmen by the members of the team for 25 cents.

Tomorrow the freshmen play the Brown yearlings at Providence, although as yet there is not sufficient transportation available to get all the men there.

The next issue of THE TECH will be the Sunrise Edition which will appear at the Junior Prom, Tuesday night. This edition will be an eight page paper with a four page rotogravure in addition. The Sunrise Edition will be placed on sale to the general student body on Thursday morning at the stand in Building 10.

SECOND TERM EXAMINATION SCHEDULE

THURSDAY, MAY 26, 1:30 P. M.

Subject	Year
*1.25 Ry. & Hv. Eng.	4

TOMORROW'S VISCOSITY TEST

THE pistol shot which starts off the 1927 Technique Rush tomorrow starts the first organized event of Junior Week. Each year Technique Rush furnishes the means of destroying the last of the old clothes remaining in our wardrobes. Each year the undergraduates forsake the laboratories in Building Four for experimental research in the Great Court. This research is under the direction of the spotless referees who direct their annual test on the viscosity of motor oil. Tomorrow little paddles of pine take on the significance of gold nuggets in the mad rush. Intrinsic value means nothing when viewed in the light of this glorified manly conflict.

Technique Rush remains the same each year as one of the older traditions of Technology. Each year successively new groups of Prom girls get their first thrill at the sight of the wild Tech Boys clawing each others clothes off atop the oil smeared hut. In recent years the chubby announcer with his white hat, red sweater, and immense senatorian voice has built himself into the tradition of the event as part of the necessary scenery.

Memories of former Rushes bring to mind a fast moving picture of a newly painted hut, large cans of black oil, white trousered attendants balancing on a step-ladder, and finally the mad rush across the gravel to storm the paddle house. Paddles numbered 1, 2, 3, 4, and 20 entitle the winners to free copies of the year book signed by President Stratton.

THE INTERCLASS TRACK MEET

TECHNOLOGY affords few opportunities to bring the girl friends to athletic contests and at the same time support them financially. This condition is peculiar to the Institute because at many colleges the athletic contests are the necessary where-with-all to make dates and cheer for the Alma Mater. We do not deplore the fact that this collegiate condition does not exist at the Institute in larger proportions, but a little of it serves well to enliven the atmosphere.

The Interclass Track Meet which will be held next Monday afternoon offers a wide variety of competition. Potential class athletes are afforded the opportunity to compete in any of the 15 events, seven of which are on the track and the remainder performed on the field. This meet affords an opportunity to find and pick men who are of varsity calibre in addition to the competitive interclass feature which it affords for any who desire to enter. To those men who have felt a desire to enter competitive contests the meet is an incentive to get out and try their ability.

We feel that the affair is one which should have support from the sidelines. The Prom Girl will enjoy the sight of a modern Grecian athletic contest as portrayed at M. I. T.

OPEN HOUSE NIGHT

OPEN HOUSE NIGHT is becoming more than just an item on the Institute program. Every year since the time the Institute first flung open its doors to the public, this night has attracted more and more visitors, and each year the Institute has made greater efforts to entertain its guests. This year by no means marks the ultimate stage. However, from all advance news the plans show a remarkable improvement over the past years.

Open House Night first originated at the suggestion of the students who desired to show their friends and relatives the actual work that was being conducted at the Institute. A trip through the corridors and laboratories during the day never made a satisfactory impression on the visitors. To satisfy the desires of these students the Open House Night was inaugurated. Thru the few years, we have now reached a point, where not only friends and relatives of the students constitute the visitors, but a kaleidoscopic multitude whose cross section reveals men and women of all walks of life, and students from other colleges and preparatory schools.

It is then of great importance that careful arrangements be made that our guests be well cared for. This burden falls on the student body and Faculty. With this point in view, we should all do our bit of Open House work—be a guide or personally direct a group of friends thru our Institute, entertain them and leave them with the very best impression of the Institute.

THE TECH BOOK LIST

WALKER LIBRARY

The following books have been added to Walker Memorial Library during the past two weeks:

Week of April 4.
Baldwin—"On England."
"Luther Burbank."
Fabre-Luce—"The Limitations of Victory."
Fraser—"Heroes of the Air."
Hobart—"The City of Long Sang."
Hutton—"Cities of Sicily."
Heber—"In Himalayan Tibet."
Israfel—"The Life of Edgar Allen Poe." (Two Volumes.)
King—"A History of Italian Unity." (Two Volumes.)
Leeming—"Ships and Cargoes."
Moon—"Imperialism and World Politics."
Neilson—"How Diplomats Make War."
Ossendowski—"The Fire of Desert Poik."
Pifkin—"The Idea of Social Justice."
Richardson—"On the Diamond Trail."
Randall—"Constitutional Problems Under Lincoln."
Williams—"India 1924-25."
Younginstand—"The Epic of Mount Everest."
Fiction
Hergesheimer—"Tampico."
Molwar—"Eve."
Tarkington—"The Plutocrat."
Week of April 11.
Beck—"The Splendor of Asia."
Bimsey—"With Seaplane and Sledge."
Ellis—"The Soul of Spain."
Loet—"Palestine Awake."
Ripsey—"The United States and Mexico."
Seal—"The House of Simplicity."
Seabury—"The Public and the Motion Picture Industry."
Shedof—"A Tibetan on Tibet."
Lodge—"Relativity."

Intercollegiates

Contrary to the popular supposition, the American Automobile Association considers Co-eds a better insurance risk than their more reckless brothers, as a result of a questionnaire sent to 125 leading insurance companies. College boys are considered so bad a risk that many companies will not insure them.

As a means of squelching a number of Spanish students at the University of Ohio, the class is permitted to hear themselves as others do, by means of an Ediphone.

Albert F. Gallistel, superintendent of buildings and grounds at the University of Wisconsin, finds so large a number of students sliding on the walks, that he is considering the erection of a ski jump to relieve the strain on the sidewalks.

Increase in the number of automobiles in a number of western colleges necessitates the adoption of parking rules about the campus.

A recent contribution to social sciences has been offered by an eminent doctor of the Imperial College of Science in England. He says if you wish to be a gentleman, or become respectable, then revert to the wilds. In addition, he says, "If England could transport a majority of its city population to the wilder parts of Australia, and leave them there more or less to their own resources, those who survived would develop into respectable persons."

Free blood transfusions have been offered by 310 medical and dental students of St. Louis University as a gift to the sickly poor who are treated free of charge in the city hospital of that city. The standard rate of \$50 a pint was refused. No student will be permitted to transfuse more than a pint in six months.

PLAY DIRECTORY

STAGE
COPLEY: "The Ghost Train."—Promising to entertain for the remainder of the season.
COLONIAL: "Criss Cross."—The Stone family dancing to good music.
HOLLIS: "The Constant Nymph."—Premier performance Monday.
NEW PARK: No show.
PLYMOUTH: "The Pirates of Penzance."—Gilbert and Sullivan revival beginning Saturday night.
REPERTORY: "The Monkey Talks."—Sawdust and Paris.
ST. JAMES: "St. Elmo."—In which the woman hater becomes himself.
SHUBERT: "The Vagabond King."—Francis Villon and the best music that Ermi has ever written.
TREMONT: "Oh, Please."—Beatrice Lillie, besieging Boston on Monday.
WILBUR: "Yes, Yes, Yvette."—A very good sequel to the famous "No, No, Nannette."
SCREEN
FENWAY: "Marriage" and "The Lunatic at Large."—Until Saturday.
MAJESTIC: "What Price Glory."—Last four times this week.
METROPOLITAN: "Blind Alleys."—Stage specialties and Sousa's Band until Saturday.
STATE: "The Red Mill."—Marion Davies in a commendable impersonation of a demure Dutch maiden.

Wesleyan University Students Vote For New Course On 'Art' of Warfare

Causes, Cure and History of Conflict Will Form Study Basis

Middletown, Conn. (By New Student Service)—A course in "War: Its Causes and Cure" is one of the recommendations embodied in the Wesleyan Undergraduate Report which is now available in pamphlet form.

A student poll on the advisability of this course showed 63.4% of the students in favor of some sort of course of that nature, 44.1% in favor of having it a half-year course, while 19.3% would make it a full-year.

"The purpose of such a course," the report says "would be to give a background of facts on the subject of war as a method of settling international disputes, so that educated men would be capable of recognizing the various factors making for conflict when they appear on the horizon of current events, and could more confidently take steps to eliminate them."

"A few of the topics covered by this course on international conflict would probably be: the history and development of the 'art' of war; a classification of the causes of conflict,—historic, economic, psychological, etc.; forces at present tending towards war and towards peace; such as nationalism, imperialism, and trade; the possible nature of a 'next war'; the after-effects of war on the 'victors' and the 'vanquished,' on business and the progress of the human race; pacifism and its limitations; problems of national defense; education for peace; disarmament; and the League of Nations."

Course By No Means Propaganda

"The course should be made as practical and as concrete as possible, with the present situation of America receiving the most attention. One man, probably from the department of history and government, would be given full responsibility for the course, but he could be aided by men from other departments when phases of the course peculiar to their branch of knowledge were to be considered. The number of topics covered, and the nature of the discussion, reading, and lectures dealing with each one, would be a matter for the professor. His permission would also be the only prerequisite for the course. The above subjects could be dealt with extensively or not, as their importance and the available time for their consideration would seem to dictate. The course is by no means a piece of propaganda for the League of Nations."

The reasons for introducing such a course on war into any college curriculum are to be found in the present international situation and in America's position of isolation. Events of international importance are taking place with a rapidity unknown in the nineteenth century. Recent developments of science have made the possibility of another war the nightmare of the human race. America's position in the world money market has placed her in the grip of circumstances ever which she has little control, and, if proper attitudes based on a knowledge of essential facts are not established, may plunge her into conflict with her debtors. There are many vital problems which cry for a solution.

"A new type of statesmanship is imperatively needed. Politicians are a drug on the market. The operation of the United States Government must be entrusted to men of appropriate education, men of broad sympathies, keen foresight, and sound judgment."

Ohio State University has instituted a university traffic court at which the students who disobey traffic regulations are tried. One student has been deprived of the use of his car for campus driving. Other penalties which will be imposed as the occasion demands, include suspension from the university.

A 60-mile an hour gale recently swept over the University of Washington campus, ripping off part of the engineering hall roof, tearing down a column of the Sylvan Theatre and felling several trees.

CLASSES BATTLE FOR TRACK HONORS BEAVERS MEET TERRIERS IN OPENING GAME

Juniors Rule Slight Favorites To Snatch Interclass Track Title

After weeks of practice, the Technology track team finally reaches its gala event on Monday afternoon when all four classes begin their yearly battle for interclass honors. A large entry list is on file in the track house, and the number of signups is increasing daily, bidding fair to eclipse former records in this respect. As for track records, it is very probable that several of these may fall, given suitable weather conditions. The track, jumping and vaulting pits, and circles for the weight men have been given daily attention this spring, and will be gone over carefully this week end, to insure the men the best possible conditions for competition.

Whether or not McCarthy can raise his recently established record in the javelin throw is a matter of considerable speculation around the track house. He has been getting off some mighty good throws, this last week, and seems to be improving constantly. There will be plenty of strong opposition, with Curran, among others, competing against him, as well as Bill Slagle, manager of track, and recently-elected president of the A. A.

Discus Sign-ups Slow
At present, the discus seems to be the most unpopular event, as only two men had entered their names up until yesterday afternoon. It is probable that Martini will carry home the prize in the discus, even if the whole squad should come out and sign up for the event on Monday afternoon. Martini will be seen again in the shot put, where he will be opposed by such men as Stachelhaus and possibly Glantzberg. The competition will be very close if these three are matched against each other.

No exceptional marks are expected in the pole vault, but Barrington and Herbert should give the rest of the competitors plenty of opposition, and what they lack in height will probably be compensated for in style and form. Good broad jumpers will fight for premier honors in this event, and it looks as though the winner will be chosen among Edlund, Berman, and Wiebe, although several other good performers are entered and will fight for places. Steele, Allen and Pease are the best bet in the high jump, and here, again, the competition will be close. The heights reached so far this year by Technology high jumpers have been fairly good, and it is about time for the men to turn aviators and dazzle the crowd with some real jumping.

Steinbrenner Favorite
Steinbrenner is conceded the two hurdles, but it will be interesting to watch the fight for second and third in both races. After the Cardinal and Gray captain has breezed past the tape, the pack is always closely bunched, and the spikes hit the finish line thick and fast a fraction of a second later. Fleming, Ross, Burgess, and Collins will provide the excitement.

JUNIOR VARSITY EIGHT TROUNCES FROSH OARSMEN

Wins Right to Meet Annapolis Jayvees by Victory on Wednesday

HAS THREE LENGTH LEAD

After an early season start that was nothing out of the ordinary, the Cardinal and Gray Jayvee oarsmen suddenly gave evidence of a promising future when they defeated both the 150-pound varsity and the freshmen in an elimination race over the Henley distance on the Charles River Wednesday. As a result of their victory (over the freshmen) the junior varsity won the right to meet the Navy Jayvee eight on April 23.

Just before race time Coach Bill Haines decided to make it a quadrangular instead of a dual race by entering the first and the 150-pound varsity eights. As was to be expected the first varsity had little difficulty in drawing away from the field, never being headed throughout the entire distance, and having over 2 lengths of clear water between it and the Jayvees at the finish.

Jayvees Are Second
The junior varsity eight took the lead from the other two shells at the start and held its position at second place over the entire course. At the finish line they were nine seconds or about three lengths ahead of the 150-pound varsity.

It remained for the 150's and the freshmen to furnish the real thrills of the day. From the outset these two crews staged a great battle. The 150's started strong and were able to gain a slight lead over the 1930 oarsmen which they had a struggle to keep for the remainder of the course. Under the Harvard Bridge they increased this lead slightly. From the bridge on to the end of the race both these crews fell behind the two leading eights quite rapidly but at the same time changed their relative positions very little. At the finish line the 150's led the freshmen by 2 seconds or about two-thirds of a length.

In summary: the first varsity led the field with a time of 7:20; the Jayvees followed three lengths behind and covered the course in 7:31; the 150 pound crew made the distance in 7:40; and the freshmen were on the small end of the score with a time of 7:42. The lineups were:—

Varsity—Bow, Tittman; 2, Donovan; 3, Kelsey; 4, Collins; 5, Malmquist; 6, Dolben; 7, Knight; stroke, Zurwelle; coxswain, Cook.
Junior Varsity—Bow, Mercer; 2, Moore; 3, Day; 4, Smith; 5, Clancy; 6, Erickson; 7, Hammond; stroke, Tappan; coxswain, Karas.
150-Pound Varsity—Bow, Pratt; 2, Newman; 3, Walker; 4, Jackson; 5, Copeland; 6, O'Connell; 7, Nichols; stroke, Gibbons; coxswain, Willet.
First Freshman Eight—Bow, Wells; 2, Burley; 3, Lytle; 4, Pratt; 5, Landers; 6, Burns; 7, Bennett; stroke, Abbot; coxswain, Sidur.

Basketball Game Indoor Version of Of "Duck Rock"

Popular Sport Developed From Old Boyhood Game to Fill Indoor Need

Probably one person in a thousand among the crowd who watched basketball games every winter has the slightest idea how the popular indoor sport was originated. The derivation of the game can be traced directly to the old boyhood amusement of "Duck Rock," and its existence is credited to Dr. James A. Naismith, instructor of Physical Education at the University of Kansas. Dr. Naismith invented the game at that college to fill a popular demand for a new sport to be played after the close of the football season.

Even the poorest of youngsters could obtain the equipment necessary to play "Duck Rock." This consisted of a large boulder about the size of a table, and a small, easily handled stone. In the game, one boy, who was "it," placed a rock on the boulder, and tried to keep all the other players from knocking it off with the stones which they had. After dislodging the rock the thrower attempted to get his stone on the rock before the one "it" succeeded in replacing his own. The one who finally did this then had the honor of being "it."

Now in basketball, one team tries to prevent the other from throwing a ball through a hoop instead of knocking a stone off a boulder. Later devel-

NINES WELL MATCHED FOR GAME TOMORROW

(Continued from Page 1)
hope of the Terriers, and worked against Northeastern only last Wednesday, the Beavers are conceded an advantage. Without its veteran pitcher, B. U. has in the past been subject to severe beatings. This circumstance leaves the way open for a strong batting onslaught, that attack in which the Beavers are favored. On the other hand they need fear no such treatment themselves. The B. U. line-up has undergone several changes which although they work for an eventual improvement in the team, will for a time cripple it.

Dorfman has replaced Jenkins at backstop, Bartlett taken McCarthy's place at third, and the latter moved to second. Alden may be shifted from shortstop because of a bruised finger and this will put O'Brien in the gap. The opening inning will probably find Ken MacDonald on first and Lawless, Kincaide, and George in the field. During the last two days, the Beav-

ers have considerably widened their scope of practice. The pitchers have altered their first object of gaining control to one of sending over curves. Until this time, the cold weather has put the pill-tossers at a great handicap. Fingers stiffened with cold would not well manage the intricate movement of the pitchers art and so had to await the arrival of a more temperate climate. Warm weather will bring about a even better display of skill than the team has shown in the preceding practice games.

The field opposite Building 4 will be used and is meanwhile to be marked out according to league regulations. Considerable difficulty was had in determining a mutually satisfactory umpire but this matter is now straightened out and meets the approval of both coaches.

**Tutorial System Used by Other
Colleges to be Tried
At Technology**

(Continued from Page 1)

ly tutorial conferences between instructor and student will be held and during these get-togethers the instructor is to discuss the reading the student has done, suggest new reading and go over written work. According to Professor Roberts, this tutorial system being used at Harvard and at other colleges would take a great deal of the instructor's time and would prove costly if applied to M. I. T. permanently.

The second method, planned to be tried along with the first, would have group meetings of the instructor and the ten hour men at a weekly hour to be arranged in accordance to their schedules. This hour will include a discussion of various topics and a presentation of papers. "Therefore, each student," says the plan, "has two separate assignments, one of his own choice for the tutorial conferences and one for the weekly group meetings. And the total work from each man will equal if not exceed the requirement of the E22 Option."

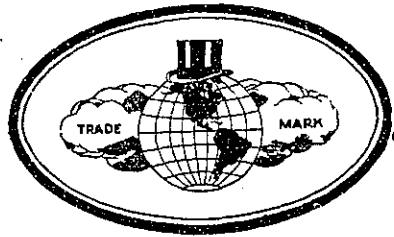

This innovation of the English system which has been used at Cambridge and Oxford Universities for centuries is aimed especially at giving the man with genuine intellectual and cultural interest a chance to follow his personal bent. Admission to the group will be by written application, stating what the interests are and what topics the applicant would wish to read and discuss.

Varsity Swimming

All members of the varsity swimming team are asked to be present at the election of next year's captain. It will be held in Room 6, Walker, today at 3 o'clock.

Paddle Fight**

(Continued from Page 1)

tered at the desk, two pistol shots will be fired. At this signal, all the contestants will go back to the ropes, and prepare themselves for the greasy fight. When the top of the hut has been thoroughly greased with the slimiest automobile oil that it is possible to procure, a single shot will be fired, indicating that the first paddle to be given out through the hole in the roof of the hut is ready to be taken away by whoever gets there first.

Twenty paddles will be distributed from the hut, at intervals of sixty seconds, and the oily, greasy fight for the coveted pieces of wood is expected to be an event that will make an indelible impression on the "Prom Girl." It always has in the past, anyway. The first four and the last paddle are good for a free Technique, autographed by the president, while the others will be autographed, but will not be free.

Every man who participates in the Rush must be able to produce a receipt for the full amount of the Technique price before entering the roped-in enclosure. During the Rush all men who secure paddles are asked to report immediately at the desk to have their names recorded before re-entering the melee.

Directly after the close of the event, all men holding receipts for Techniques will be able to secure the year-books at the Information Office in the case of the books with the name of the owner in gold on the cover, while the plain books will be available at the Cashier's Office.

Rent A Car for the PROM

THIS introduces to University students a new way of getting around that has met with instant favor because of its convenience and economy.

You can now rent a fine private automobile that you drive yourself—take where you like—in fact use exactly as you would a car of your own.

Whether you're going for a trip of a few miles, a week-end trip or need a car for the evening occasion—you'll find this service mighty convenient.

You come to our station—select the car you want—and you're on the way. It takes about two minutes. No red tape—no annoying questions.

The only requirement is that you be qualified and competent to drive a car. That is all.

The cost is much lower than you would expect. Next time you want to go somewhere—we invite you to go in one of our cars.

Ride in Groups and Split the Cost

It costs no more for five to ride in one of our cars. Plan a trip with three or four others—divide the bill—and the cost to each is so small you'll never miss it.

SIMPLEX WIRES AND CABLES

SIMCORE—National Electrical Code Standard. Every length is subjected to searching electrical tests to insure a first quality product. Ask for specifications.

CAOUTCHOUC "B.C."—A rubber covered braided wire insulated with a 30% Para compound. Send for specifications.

LEAD COVERED CABLES AND WIRES—For underground distribution where a conduit system is used.

STEEL TAPED CABLE—Used where a conduit system is not available. It carries its own conduit. Descriptive booklet upon request.

CONDEX PARK CABLE—Adequately insulated and protected by an overlapping, interlocking flexible steel conduit. For series lighting circuits.

OVERHEAD SERVICE CABLE—Designed for use between pole and house where service is not carried underground.

FIBREX OVERHEAD SERVICE CABLE—For aerial service connection from pole to house when service must pass through trees.

FIBREX TREE WIRE—For installation among trees or where chafing may occur. It is non-inductive. Send for circular.

FIBREX FIRE ALARM CABLE—Consists of a multiple conductor cable protected with the abrasion resisting fiber tape which protects FIBREX Tree Wire and FIBREX Overhead Service Cable.

SUBMARINE CABLES—For power transmission or for telephone or telegraph service. Our engineering department is always available for consultation.

SIGNAL CABLE—Dependable insulated cable for railway signals and police or fire alarm service.

IGNITION WIRES—Used extensively, and with satisfaction throughout the automotive field.

TIREX PORTABLE CORD—For electrical tools and appliances. Rubber-armored. Flexible. It cannot kink, and has the wearing qualities of an automobile tire.

TIREX SJ CORD—A rubber armored cord for drop lights or table lamps, made in colors. Send for folder.

TIREX MINING MACHINE CABLES—Heavily insulated, rubber-armored, portable cables with the wearing qualities of a cord tire.

POLE FIXTURE CABLE—For wiring from the base of ornamental lighting standards to the lamp fixture at the top or from line to lamp on goose neck fixtures.

ARC CABLE—For connecting swinging arc lamps with transmission lines.

AUTOMOBILE—Wires and cables for lighting and ignition systems.

RUBBER INSULATED CABLES—For any commercial voltage. Special descriptive bulletin on request.

CAMBIC INSULATED CABLES—For power transmission service, submarine, underground or aerial. Special bulletin on request.

PAPER INSULATED CABLES—For high voltage power transmission. Descriptive bulletin upon request.

SPECIAL INSULATED WIRES AND CABLES—To meet any conditions of service. On specification drawn by our engineers or to conform to customers' specifications.

Technically trained experts who know how to impart the qualities which insure satisfactory service supervise the manufacture of all Simplex Wires and Cables.

SIMPLEX WIRE & CABLE CO

Manufacturers

201 DEVONSHIRE ST., BOSTON

Chicago San Francisco New York

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY Cambridge, Mass.

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY offers Courses, each of four years' duration, in Civil, Mechanical, Electrical and Aeronautical Engineering; Naval Architecture and Marine Engineering; Mining Engineering and Metallurgy and Geology; Architecture and Architectural Engineering; Chemistry, Chemical Engineering and Electrochemical Engineering; Biology and Public Health and Sanitary and Municipal Engineering; Mathematics, Physics, General Science and General Engineering and in Engineering Administration. These Courses lead to the degree of Bachelor of Science.

To be admitted to the first year class applicants must have attained the age of seventeen years, and must satisfactorily fulfill entrance requirements in Algebra, Plane and Solid Geometry, Trigonometry, Physics, Chemistry, English, History and French or German and two units of elective subjects. Examinations are required in all subjects except Chemistry, History and the electives, the requirements for which are fulfilled by the presentation of satisfactory certificates. A division of these entrance subjects between different examination periods is permitted.

Entrance examinations are held at the Institute in September. In June applicants will be examined by the College Entrance Examination Board in Boston, New York, Philadelphia, Chicago, and many other cities in America and Europe. A circular stating times and places is issued in advance by the College Board.

Graduates of colleges and scientific schools of collegiate grade, and in general all applicants presenting satisfactory certificates showing work done at another college corresponding to at least one year's work at the Institute, are admitted, without examination, to such advanced standing as is warranted by their previous training.

Graduate courses leading to the degree of Master of Science, Master in Architecture, Doctor of Philosophy, Doctor of Science and Doctor of Public Health are also offered. Special Research Laboratories of Physical Chemistry, Organic Chemistry, Applied Chemistry and Science have been established.

Correspondence should be addressed to the Institute.

PUBLICATIONS

Catalogue; Bulletins of General Information, Summer Session, and Graduate Study and Research; and the Report of the President and Treasurer.

Any of the above named publications will be mailed free on application.
